

**Q HOW CAN I GET WHITER TEETH?**

**A** If you are happy with the shape and position of your teeth, a simple in-office power whitening would be your first choice. Using a very strong Hydrogen peroxide solution and a laser light can get your teeth up to 4 shades lighter, also with proper home care and touch ups the shade could last for years.

**Q IS IT EASY TO STRAIGHTEN TEETH?**

**A** If your teeth have great shape then Dr. Pasha recommends invisible braces to straighten your teeth without unsightly metal brackets. Clear braces are very effective in closing gaps between teeth and bringing teeth in a perfect line. Another advantage is that you can leave them at home if you are going on a date, keeping your braces as your little secret.

**Q WHAT CAN I DO IF I HAVE LARGER GAPS AND UNEVENLY CROOKED TEETH?**

**A** For the most effective and permanent change to your smile, porcelain veneers are the right choice for a complete makeover. With porcelain veneers, you can permanently change the shape, orientation, and color of your pearly whites to achieve your ideal smile. The advantage of porcelain veneers is that we can permanently change the color of your teeth by several shades, put all of your teeth in line, and give you an ideal shape in just a few weeks. Veneers will help you keep a beautiful youthful look for years to come.

# THE SMILE OF YOUR DREAMS

Our featured cosmetic dentists, Dr. Ben Reyhani and Pasha Hakimzadeh of West Hills Smiles, have performed hundreds of smile makeovers. They believe, "Dentistry is a service, and you have to really listen to your clients,"
